Computer Science student at Kennesaw State University graduating in Dec 2026 with experience building AI document-processing pipelines, databases, and cloud applications using Python, SQL, and AWS. President's List honoree with experience leading development teams. Seeking entry-level software and data engineering opportunities.

EDUCATION

Kennesaw State University

Bachelor of Science in Computer Science

Kennesaw, GA

Aug 2021 – Expected Dec 2026

President's List: Spring 2025, Spring 2026

- Earned a 4.0 semester GPA and President's List recognition in multiple terms.

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Software Engineering, Computer Architecture, Parallel & Distributed Computing, Cloud Software Development, Machine Learning, Data Mining, Artificial Intelligence

TECHNICAL SKILLS

Languages: Python (Pandas, NumPy, Matplotlib, scikit-learn), SQL, Java, C#, JavaScript, HTML, CSS

Tools & Platforms: AWS (S3, EC2, RDS, Lambda), MySQL, SQLite, Git, GitHub, GitHub Actions, Linux, LlamaIndex, Tesseract, PaddleOCR, Chart.js

Concepts: Data Modeling, Relational Databases, Object-Oriented Programming, Retrieval-Augmented Generation (RAG), Vector Search, Optical Character Recognition (OCR), LLMs, Text Chunking, Data Extraction, Document Classification

Methods: SDLC, Requirements Analysis, Automated Testing, Code Review, CI/CD, Debugging, Technical Documentation,

EXPERIENCE

AI Document Intelligence Extern | *Python, OCR, RAG*

Aug 2026 – Present

Extern — Pfizer Program

Remote

- Building a Python pipeline to automate extraction and classification of pharmaceutical vendor documents using OCR and retrieval-augmented generation.
- Implementing and evaluating Tesseract and PaddleOCR workflows to extract structured information from scanned and digital pharmaceutical documents.
- Developing a RAG-based retrieval system with LlamaIndex and vector search, experimenting with chunking strategies and LLMs to improve retrieval quality.
- Evaluating end-to-end OCR accuracy, retrieval quality, and routing performance; documenting model trade-offs and deployment recommendations.

SQL & Database Architecture Extern | *SQL, HTML, Chart.js, Data Modeling*

Jul 2026 – Aug 2026

Extern — Breaking Games

Remote

- Built an ETL workflow integrating 6 disconnected e-commerce data sources into a queryable SQLite database for marketing performance and inventory analysis.
- Developed SQL marketing attribution linking ad spend to revenue across 400+ referral sources to support marketing budget recommendations.
- Performed data cleansing with SQL by filtering bot traffic and invalid records, preparing multi-source e-commerce data for marketing attribution and exploratory analysis.
- Built and presented an interactive HTML and Chart.js dashboard and Holiday Game Plan to Breaking Games, recommending inventory reorders and marketing priorities.

Retail Sales Consultant

Dec 2022 – Feb 2023

AT&T

Marietta, GA

- Learned internal systems quickly and collaborated with teammates to resolve customer issues.
- Assessed customer needs and recommended service solutions, translating technical tradeoffs into clear, practical guidance.

PROJECTS

ShopSync E-Commerce System | *Java, JavaScript, HTML/CSS, MySQL, AWS*

Feb 2026 – May 2026

- Delivered a database-driven e-commerce system in 4 months by leading a 5-person team through the full software development lifecycle.
- Developed product browsing and checkout workflows by deploying services on AWS EC2, managing relational data in AWS RDS, automating tasks with AWS Lambda, and serving assets from AWS S3.
- Improved data consistency and retrieval reliability by designing normalized SQL data models.
